

LOTT Alliance
Interpretive Planning & Design

Client
LOTT Wastewater Alliance

Location
Thurston County, WA

Continuing our involvement with environmentally conscious interpretive themes, LCS worked with the LOTT Alliance in South Puget Sound to develop an interpretive and education plan to increase the awareness of water, wastewater treatment, and environmental stewardship. Work included interpretive and identification signage plans for all LOTT facilities, and phase one of the implementation plan: the design and fabrication of signage for the Hawks Prairie Reclaimed Water Ponds and the Martin Way Reclaimed Water Plant.
